Summary

Product Security Analyst with 1.5 years of experience as a HackerOne triager, demonstrating a strong track record in handling complex, high-priority vulnerability reports and driving impactful remediation efforts. Skilled in vulnerability triage, impact assessment, and secure architecture across web, mobile, API, and cloud environments. Experienced in end-to-end triage management, ensuring accuracy, efficiency, and customer satisfaction while collaborating closely with hackers, customers, and engineering teams to streamline resolution. Now seeking to expand my impact through a senior role with broader technical and leadership responsibilities.

Experience

- | | |
|---|-------------------|
| Product Security Analyst, <i>HackerOne</i>
As a Product Security Analyst, my role involves reviewing and validating vulnerability reports submitted by security researchers globally. I craft detailed, well-structured summaries with relevant proof of concepts and forward them to clients for remediation. My work spans diverse domains, including web, mobile, API, Web3, binary, and GitHub-related vulnerabilities. | 05/2024 – Present |
| Synack Red Team Member, <i>Synack Inc.</i>
• As a Synack Red Team member I am a part of a group of elite cyber security researchers. I conduct security assessments of web applications, mobile applications including Android and iOS applications in my part time. | 03/2021 – Present |
| Bug Bounty Hunter, <i>YesWeHack</i>
• As an independent security researcher and skilled bug bounty hunter I work part time on YesWeHack platform to skill up and submit interesting security vulnerabilities on multiple fortune 500 companies. On YesWeHack I have participated in many private programs. | 05/2020 – Present |
| Bug Bounty Hunter, <i>Bugcrowd</i>
• As an independent security researcher and skilled bug bounty hunter I work part time on Bugcrowd platform to skill up and submit interesting security vulnerabilities on multiple fortune 500 companies.
On Bugcrowd I have participated in many programs including Dell, Walmart, MasterCard, California Government, etc. | 05/2020 – Present |
| Security Researcher, <i>HackerOne</i>
• As an independent security researcher and skilled bug bounty hunter I work part time on HackerOne platform to skill up and submit interesting security vulnerabilities on multiple fortune 500 companies. On this platform currently I am in top 20 researchers on BMW Group's program also I was rewarded with a medal coin from UK Ministry Of Defense. | 05/2020 – Present |
| Senior Security Consultant, <i>NetSentries Technologies</i>
• As a senior security consultant my responsibilities include validating our ASM product's scans, perform thorough manual testing of web & mobile applications, network infrastructure and APIs. | 11/2021 – 05/2024 |
